City of Unalaska
PO Box 610
Unalaska, AK 99685
Attn: Vince Tutiakoff, Mayor

Dear Mr. Mayor:

I am writing to express my support of the City of Unalaska "Going Green" by means of geothermal power from the Ounalashka Corporation (OC) and Chena Power (OCCP, LLC) at Makushin Volcano. OC's development of this geothermal resource, as well as the installation and distribution of clean energy, is a critical first steps in reducing emissions.

Geothermal power can provide the community with enhanced electrical production which can increase energy security. Unalaska residents and businesses can look forward to lower and more consistent utility rates. In addition to powering the City, geothermal power can stimulate Unalaska's involvement in additional sustainable industries such as agriculture, the accommodation of other advanced technologies, installation of energy infrastructure, and appealing to eco-tourism.

OC, through its joint venture with Chena Power, is not only presenting the City of Unalaska with an opportunity to participate in this historic moment, but is also willing to finance the project and accept the associated risk.

I encourage the City of Unalaska to form an agreement with OC and Chena Power.

Thank you for your consideration.

Sincerely,

M. Lynn Crane
