The word cloud requires at least 20 answers to show.

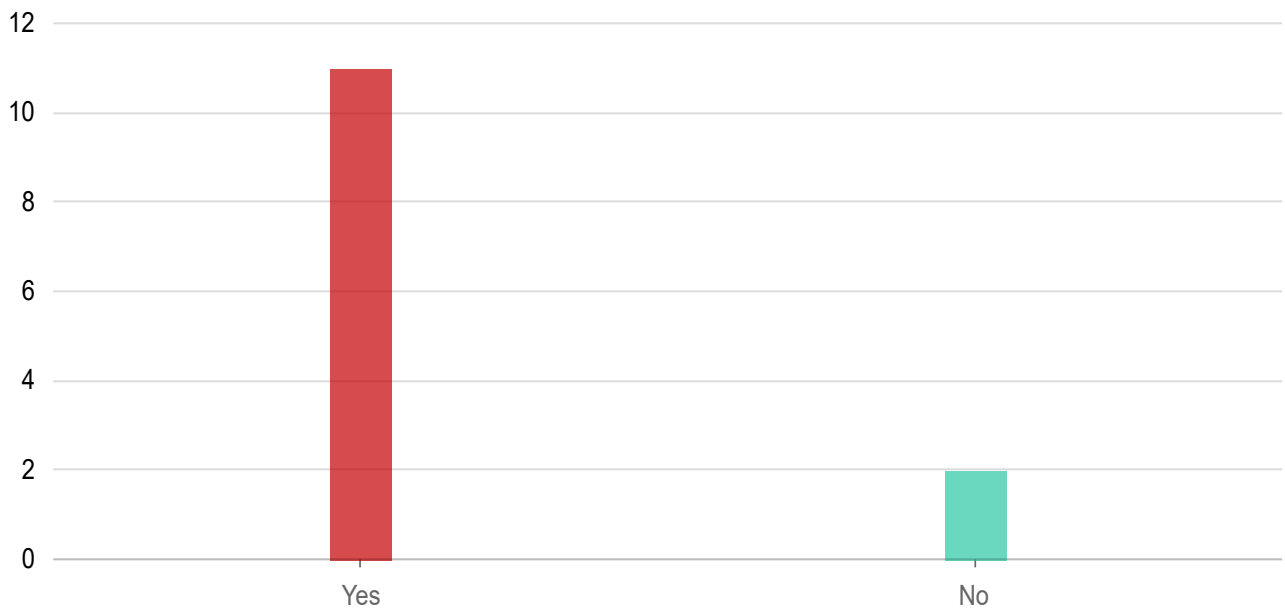

Response	Count
----------	-------

We were in masks and the timeline was very possibel I wasn't in contact during their time of infection.	1
quarantined instead	1
Protect myself.	1
Medical Person in Charge in the "industry."	1
It just so happened that I was tested the day BEFORE I found out I was exposed, and it was negative.	1
I was quarantining for 2 weeks anyway.	1

I was getting tested anyway due to employer requirement. Otherwise, I would not have tested due to the high cost of the local testing at the clinic.	1
I want to keep myself and my community safe. I believe this information is also important when collecting scientific data about the virus/masking/social distancing.	1
Could not go to work if I was not tested.	1
Because I want to make sure I don't have it and that I won't spread it to others	1
Because I am high risk and my husband is also.	1
A passenger on a flight I was on tested positive.	1

d. Other comments about the airport experience:

Response	Count
----------	-------

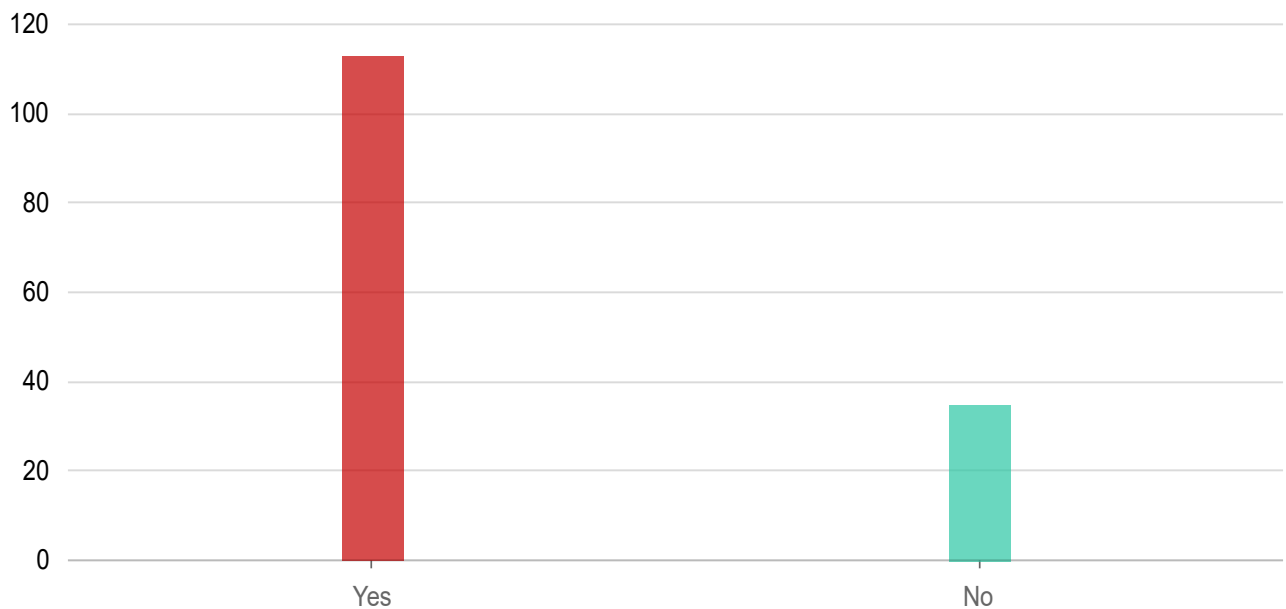

I took the ferry	2
Your Airport is like a third world country.	1
We were not given any such form.	1
Unsanitized. No hand sanitizer or masks offered to change masks worn on the plane or to sanitize hands after arrival.	1
UFD does a great job!	1
There wasn't anyone actually enforcing non travelers to stay out of the building.	1
The police presence was either so minimal that I do not remember it, or they were not there at all informing arriving passengers of local mandates.	1
The plane dropped us off outside then we grabbed our luggage then a cop handed us a paper and we left home.	1

The person collecting my form did not check if I am sick just collect it from a passenger who was clearly showing flu symptoms	1
The first time I travelled I only received a flyer (august) but the second time had to provide contact info (December)	1
The fire department is rocking the airport. I was always met with a smile and they were very helpful.	1
The airport is okay, but once on the plane, I noticed people remove their masks and the flight attendants didn't say anything.	1
Some workers weren't wearing masks when they were helping me lift my luggage. Incredibly stressful.	1
Some people did not make any effort to distance from others. The small size of the waiting area insufficient to distance that many people from one another.	1
Seemed to take a long time to get a routine in place. There needs to be a staffed migration desk with paperwork / stamp showing entry/exit date for quarantine protocols for all incoming traffic. Followed up on by local law enforcement at least once.	1
No contact tracing paperwork was given out.	1
Needed a better system, people trying to get into the airport, too congested.	1
NA	1
More information on who to talk to in case of emergency or aid.	1
Locally it was fine. The process in Anchorage was a nuisance.	1
Last traveled July - I don't believe they were doing contact firm then	1
It was the Cold Bay airport that Made me concerned, there was no social distancing there.	1
It was just fine. The airport experience in Anchorage sucks though.	1
It was early on so I don't believe all these measures were in place yet.	1
It was actually my spouse that traveled and received the information and completed a contact form.	1
I think the town could do a lot better having a real designated area for arriving passengers and having a temperature kiosk for incoming passengers at the airport. to protect your front lines checking the incoming passengers.	1

I should be able to fly without providing my medical information. This breach of privacy is unacceptable and illegal. The agents were deceptive and it doesn't go unnoticed.	1
I have traveled 3 times into Dutch. The contact papers were not being given out the first two times I traveled. The third trip we received the contact form in Anchorage which was great. We had it filled out when we got here.	1
I completed the contact info in Anchorage	1
Hounded by an officer asking for a sheet I was supposedly given by the airline. No sheet was given. Found out later it was a voluntary sheet, no need for officer to intimidate.	1
Hered up by the animal control officer to fill out the forms. Appropriate given we are treated like animals that can't think for ourselves.	1
For question 9 I received a sheet both times, but strangers on my plane did not. The person facilitating the paperwork, only interacted with locals (who by the way, knew the rules). They completely ignored the non-residents.	1

b. What did you do during quarantine?

Response Count

Worked, watched movies, and spent time outside away from everyone	1
Worked, read, exercised, watched television/movies, caught up with family/friends, cleaned/organized - all at home.	1
Worked remotely.	1
worked remotely	1
Worked on my house.	1
Worked from home; took walks; took drives; worked on projects in the home	1
Worked from home. Took long drives. Walked my dog in the hills alone.	1
Worked from home, went on walks by myself or with family members also in quarantine.	1
Worked from home and went for walks outside, alone and away from the public.	1
worked and took care of my kids	1
Worked and spent time with my family	1
Worked and exercised outdoors alone.	1
Work.	1
Work tv hike fish drive around sight seeing	1
Work remotely, picked berries, read	1
Work on house	1
work from home	1
Went outside, went to work, stayed home. Followed the rules to be a good community member!! Wish everyone would do the same	1
Went for hikes, worked from home, fished, cooked, cleaned, bike rides, beach comb.	1
Went crazy!	1
went camping and fishing	1
We spent a lot of time on home projects. Just trying to make the best of it. Getting groceries was difficult. Not being able to visit the post office was a huge problem.	1

We had someone else pick up our mail. We placed orders online at the grocery store and friends and family picked up for us. We both worked modified schedules when no one else was at our place of employment.	1
Watched movies and drank a little more than I should	1
Watch korean movies, watch the game show on tv! talked to my family from California and messenger to my relatives in the philippines.	1
was in my office most of the time or in my home. rarely ventured out	1
Walked outside, gardened, worked from home, cleaned, learned more about chocolate forms and photography, and cooked. Read a lot.	1
Waited for it to be over.	1
Video games, work from home, homework, play games with family	1
TV/ cleaning/ computer	1
tried to be outside as much as possible. It was difficult having the whole family isolated for 2 weeks.	1
took many walks and hikes; read books; home improvements	1
Took college classes and studied.	1
Teleworked, hiked, walked on the beach, read books	1
Stayed inside, went for walks with mask on	1
Stayed in my house, my friends ran errands for me.	1
Stayed in my apartment, read books, watched movies online, talked with family on video, updated personal information with DMV, updated voters registration, and cleaned up my living space.	1
Stayed in my apartment the whole time.	1
Stayed in an unfurnished apartment the whole 14 days (15 days actually)	1
Stayed home. Watched movies. Went a little crazy. Took drives.	1
Stayed home. It is not complicated and a small sacrifice to protect others. Get with the program folks.	1
Stayed home.	1

Stayed home, went to work per my employer plan, got tested x 2 (per employee plan), checked for symptoms, spent a lot of time outdoors with my family, cooked good food, read books, watched movies, took up a puzzle interest	1
Stayed home, separated from all, missed work, could not carry out normal business or interactions with others. It's ridiculous at this point in time to MANDATE quarantine. Let people make their choices to keep themselves and their families healthy.	1
Stayed home or hiked	1
Stayed home just like I was asked to do. Relied on local friends to get groceries and other needed items.	1
Stayed home aside from going to the clinic for Covid testing three times in 14 days.	1
Stayed home as mandated.	1
Stayed home and worked because we are critical	1
Stayed home and felt the quarantine is absolutely unnecessary unless symptoms are present.	1
Stayed home	1
Stayed away from people.	1
Stayed at home. Went for drives and walks, alone	1
Stayed at home, walked outside wearing a mask, if weather permitted. My son dropped off my mail and groceries at my door. He wore a mask.	1
Stayed at home and worked as able per my employers modified quarantine plan.	1
Stayed at home and went to the clinic to get tested!	1
Stayed at home alone. Fridge was stocked.	1
Stay home.	1
Stay home	1
Stay at home only.	1
Stared at the wall.	1
Stare out the window and watch the world go by without me.	1

Slept-in, watched TV, got bored	1
Sat in my house. Went to the post office at night when no one was there. My husband had to quarantine too, unpaid. He lost two weeks of pay because of this stupid mandate. I was fortunate enough to be paid during quarantine, but not everyone is so lucky.	1
Rest, watch tv, eat, sleep.	1
Remote work from home, Exercise, Read books, Make great meals	1
Recovered from surgery	1
Read, Play video games, Eat, Sleep, Work from home, think about if being up here for work is worth the headache in dealing with the on again/off again risk levels	1
Read, Play Board Games, Cards, Play with myself, thought of ways to escape Alcatraz/Unalaska	1
Read, plan lessons, telework, walks outside with mask and social distancing	1
Read a lot, watched tv	1
Puzzles and TV and worked from home	1
Pick berries, clean my house, watch lots of kdrama	1
Paint my house!	1
Outdoor activities	1
Not a whole lot	1
My husband and I together with our newborn quarantined at my dad's apartment while he stayed in another apartment. We tested for COVID19 thrice while quarantining. All three tests came back negative. We just stayed at the apartment for two weeks.	1
I worked on a project at on my house. I also went hiking a lot out in the summers bay area.	1
I worked	1
I was able to work remotely	1
I understand why news media presents the image of increased alcoholism, substance abuse, suicide. I do not feel this was healthy at all. Council's 1st mandates were excessive. City mayor and admin were found violating these. Fishing on a boat with friends	1

I stayed home, and hiked at night to avoid coming in contact with anyone.	1
I stayed home and went on some walks/hikes wearing masks and socially distanced. I had friends deli very contactless groceries.	1
I stayed home and did household jobs. It was nice I could walk outside with other family members who also under quarantine.	1
I sat locked in my home like a criminal under house arrest. I wasn't even allowed in my own yard on my own property. Our neighbors call the cops if somebody brings us food. Great job serving our community. :(1
I lived and worked in quarantine	1
Home exercise, reading, tv	1
hiked with my dog stayed home	1
Hike, watch movies	1
Got fat	1
garden work---Green house-- spent a lot of time at Morris Cove--Art work at home.	1
Followed local mandate (2 weeks)	1
Fish, hike, sightsee alone, work from home, read, watch tv, chores.	1
Fish and hike	1
Finished moving into our new space. Played outside a lot. Did Projects around the house. Worked from home.	1
Due to winter weather we stayed at home. Read, watched TV, games and worked puzzles.	1
Did outdoor activities where there was no contact with others; cleaned the house; etc.	1
Cleaned and organized my house, and hiked outside a lot.	1
Camping, hiking and CLEANING	1
Ate bread and water. Didn't shave, anywhere. Cut myself to mark the days in captivity. Felt deprived and depressed so I turned to drugs and alcohol.	1
Activities inside my home, tele-work, outdoor activities with household members.	1

To truly make the 14 day quarantine or any quarantine work, it needs to be monitored. Physically no way the police department can monitor all travelers and make sure they are following local mandates and staying indoors, since allowed out for "exercise".	1
They've been doing a good job making sure people understand the mandates. I'm not as much in favor enforcement unless someone is being belligerent or rude to an officer.	1
They shouldn't be put in the position to have to enforce any of the mandates. I think we should open up just like they have down south and in other parts of Alaska. NO MORE QUARANTINE!	1
They should set a better example to the Public. If someone is flaunting quarantine restrictions, they are potentially endangering others; it isn't really any different than DUI. Many Americans have needlessly died due to selfish and uncaring behaviors	1
They should not be enforcing a mandate that should have not been allowed.	1
They should not be directly involved in that regard as they have other areas they should be focused on.	1
they should make sure people who travel follow mandates	1
They should have done their job! By Enforcing the local health mandates! From the beginning of this mess. THE POLICE AND FIRE DEPARTMENTS SHOULD ALSO FOLLOW THOSE MANDATES! Wearing of masks and proper quarantining.	1
They could be more of a presence in public places (see next response) like the stores, post offices, etc, to remind people that mask wearing is mandatory.	1
They are doing fine, telling people what to do is enough. There is not enough data to suggest that fining or imprisoning someone for disagreeing with a mandate is warranted.	1
There needs to be a staffed migration desk at the airport with paperwork / stamp showing entry/exit date for quarantine protocols for all incoming traffic. All incoming traffic need to be followed up on by local law enforcement at least once.	1
There is not much more they can do other than reminding people and following up on reports they receive.	1
their job and patrol I reported several people who broke the mandate and nothing happened.	1
The quarantine language in the beginning of the pandemic was terrible. To allow people to quarantine in same house, same bed as someone who is NOT in quarantine was ridiculous. No wonder COVID spread when 1/2 house didn't need to quarantine.	1

The police need to make sure they are following mask mandates in public to set a good example. I wouldn't have been against fines for refusing to mask or quarantine properly.	1
The mask mandate could have been better enforced at the stores. Even now, there are boat crews and other members of the community who wear masks improperly or don't wear masks at the stores.	1
The mandates should be entirely abolished. They were never constitutional, never necessary, never legal. The rest of Alaska is free as it should be. If the police want to do something, they can start by protecting our rights as citizens.	1
The dude at Public Safety that was in charge of enforcing the mask mandate was one of the worst offenders. Not good and you guys should have known about it and done something about it.	1
support local retail workers in trying to enforce mask mandates in public places. make the postmaster wear a mask at the post office.	1
stricter on incoming passengers - making sure people are following the quarantine mandate. Vessels following the quarantine mandate.	1
stop the mandates	1
Start charging businesses/people who don't want to comply with the local mandates.	1
Something had to be done to make an impact on people who had trouble believing scientific facts. A fine would be appropriate. Like paying a traffic ticket.	1
Simply increase education	1
Shoot first, ask questions later! You could throw the violators in Jail, they have a much higher chance of catching the virus and learning an important lesson about public health mandates	1
Repeat offenders should be fined, otherwise warn and educate.	1
REMOVE THE QUARANTINE OR COMPENSATE PAY. SHOULD BE ILLEGAL TO FORCE PEOPLE TO STAY IN THEIR HOMES FOR TWO WEEKS.....	1
Reminders, maybe low cost tickets (like \$25)	1
Remind individuals of the quarantine period and expectations during the quarantine period. Make known/educate support services available to individuals during quarantine.	1
Publicize examples of infractions and consequences in police blotter etc.	1

Prosecute people found to break quarantine. There are warnings for fines but no follow-through. Enforce capacity limits at local establishments (i.e. The Rat).	1
Patrol Margaret Bay bunkhouse to make sure people who don't stay there are not going in and out.	1
Once everyone who wants the vaccine has received it, I would like to see the travel quarantine lifted.	1
Nothing. We should never have locked down with any local mandates which are Unconstitutional. South Dakota has had no problems and the state never went into lockdown.	1
Nothing. This should be a health advisory situation at this point and not mandates. No one in our town has died. Vaccines are available to all at risk persons. The police should not be involved.	1
Nothing. I believe reduced restrictions will be less burdensome and more will understand and obey. I heard a lot of people only followed CDC 7 day quarantine and non were connected to virus spreading.	1
Nothing. This is a free America, or is supposed to be.	1
Nothing.	1
Nothing, we should respect our citizens and just inform of what we would like them to do, as sovereign beings we can decide for ourselves, as the constitution has it.	1
Nothing, I don't believe they should enforce or charge anyone for something that doesn't violate a law. A mandate or resolution is not a law.	1
Nothing of significance was actually done to enforce anyone breaking quarantine this entire time. ESPECIALLY when the crabbers/fishermen started coming in more frequently, no one was holding them accountable for breaking mandates constantly, money talks	1
Nothing - the local government should follow the state and federal mandates and keep adding extra mandates.	1
None	1
NO MORE MANDATES	1
No comment	1
No	1
more vigilant to non resident arriving in the island.	1

More vigilant and take reports from local store personal seriously. They usually know who among the locals had just returned from travels. Or if they are from a boat and had just been on island. Also a code id checkin might help enforce quarantine	1
More frequent personal checks and advise	1
Make sure people are staying out of the public.	1
Keep track of who is in quarantine and when and make sure they aren't in town. Could take vehicle/license plate info to know if someone is where they shouldn't be	1
keep doing what you are doing! the guy at the airport was very helpful	1
Just be friendly and remind people that we still have mandates to follow and to be there to assist anyone in need.	1
It's very easy to believe that law enforcement personnel could or should have done more to enforce city mandates; likely much more difficult to carry out.	1
It's hard to monitor everyone who arrives and is supposed to quarantine and monitor local health mandates. I would prefer the police department to focus energy elsewhere like drug issues.	1
It's hard to enforce local health mandates. I would prefer the Police focus on other matters such as the hard street drug use.	1
It disturbs me that some of the officers thought it below them to enforce the mandate. This is a dereliction of duty. They took an oath to protect and serve. They violated it.	1
Issue fines	1
Issue citations for failure to follow quarantine	1
Issue citations and fine those who violate the mandate particularly those who should be quarantining. You hear, and sometimes see folks who should be quarantining out and about. Follow-up and follow through with the calls that they receive.	1
I'm not sure	1
If quarantine mandates are in place for people travelling to the island, then there should be some enforcement and fine in place for those who don't follow the mandates. Otherwise, get rid of the mandates and quarantine and let people live their lives.	1

If possible, they need to fine people who refuse to follow the rules. They should also have someone doing airplane duty to make sure those people are following the rules. Would be a good time to ask for community help to watch people.	1
If it's possible, fines should be imposed for people who break quarantine protocol.	1
I think they should have paid more attention to the coming and goings at the airport.	1
I think they should do more.	1
I think they should continue to enforce the mandates like they have been. More verbal to those who violate the city mandates verses charges.	1
I think they should be taking every measure to enforce the mandates.	1
I think they need to issue warnings and then citations if the health mandates are not being followed. If nothing is done then these are not mandates, they are just suggestions.	1
I think they did a good job	1
I saw zero enforcement by UPD, it was disappointing. It appears that several officers weren't interested in following the mandates.	1
I don't know, they should enforce children out of car seats and no seat belts first.	1
I don't know if there was any followup when the hotline was called to report someone not adhering to the mandates. Seems as if there were no consequences for any infraction.	1
I don't know about city-wide... but officers should at least wear their masks properly. Although most do, I have seen the very tall, Caucasian officer wearing his mask under his nose, and sometimes mouth, repeatedly. With no attempts to adjust mask.	1
I don't believe that fines should be given out. I would think that a strong word would be best, unless someone continues to put others at risk.	1
I do not believe that should be the governments jurisdiction. We are not an authoritarian government. Nor should we continue to act like one. Individuals need to be allowed to exercise their free rights. Personal choice is what I believe in.	1
Hold people accountable for breaking rules and endangering the community.	1
Health mandates should be "recommended" but not mandatory. Quarantine needs to end, perhaps just requiring a test at the airport. If people are high risk they can choose to take necessary precautions, but life can't stop for the whole community.	1

Have strong consequences (perhaps fines) for those who violated quarantine and mask wearing mandate	1
For legal and constitutional mandates, Inform people of the mandates for first offense. If refuse to comply or second offense, issue citation.	1
Follow up on quarantine violations	1
Follow through on the fines and consequences that are advertised. Hold local establishments (bars, restaurants, etc) to capacity regulations and other mandates.	1
Fines for violations; jail for repeat offenders	1
Fines for people who break quarantine and stricter enforcement/fines for businesses that are not following mandates.	1
Fine offenders, educate public while doing rounds	1
Fine folks who do not follow the quarantine provisions. Enforce the restrictions.	1
Enforcement could be legally challenged. Mandates overreach authority. HIGH risk person should SEPARATE SELF for safety NOT expect OTHERS to keep them safe (IE mask on others keeps me safe..NOT)! Make choices for YOURSELF & let others do the same.	1
Enforce them. They don't seem to be making any attempt to serve and protect.	1
Enforce local mandates	1
Enforce high fines (more than \$3000) for those who don't follow the mandates. The only reason we had community spread is because people failed to comply with the mandates. Even if the person who failed to comply was fined, the \$500 fine is not significant	1
Educate people who are out of compliance with local and state mandates.	1
Educate and enforce blatant it persistent violations.	1
Did they even enforce the mandates?	1
Charge and fine the folks who aren't following the mandates.	1
Businesses should be cited for not enforcing mask mandates in their establishment, not the individual, primarily because it would be the easiest way to ensure compliance and make enforcement easier. There have been no consequences so far noncompliance.	1

What should you do if you see someone not following the mask mandate in a public place (Safeway, PO)? Thanks for all your time and efforts. Our community is very special and I feel lucky to have felt safe during the pandemic.	1
What reason do I as a healthy not at risk person have to vaccinate if not to regain a normal life? If we continue to ignore the data and pretend that we are more at risk on this island than we are than people will start ignoring the advice of the EOC.	1
What does the emergency operations center really do?	1
We were not allowed to have any non-employees at work until this week which made it very difficult to complete job duties. All interactions occurred remotely and not always in a timely manner.	1
We need to be able to bring people in at a lower quarantine time frame. If we have a tech who is supposed to come into to service printers and has been fully vaccinated him and his partners should be able to service our printers.	1
We have limited spaces with LARGE #s of people (ie Safeway...), and I would love to see better enforcement of PROPER mask wearing in those places. & employees at AK Ship or food services (coffee, sushi), that don't wear a mask (properly). Frustrating.	1
We all have the right to exercise our freedom of choice. HIGH RISK persons can choose to stay out of public spaces. Businesses can ask patrons to mask; city government does not have the authority to MANDATE quarantine, masking, gathering size.	1
Very thankful for the City Council making the tough decisions to make our community safe.	1
Update posted notices that are all over town. Some are very old mandates.	1
This virus is nowhere near as bad as the country was told in the beginning. Churches should never have been told to close. Its a slippery slope. Look at what's happened in other countries that have told churches to stop meeting. Plz advise, dont mandate.	1
They have been doing a great job keeping this community safe. Some dont like the rules, oh well. The rules are what's working for this town. Keep up the great work and do what you know will keep us safe. Thank You!!	1
They are doing a good job informing the community of latest updates from dhss and cdc	1
These are trying times. Keep your focus on the mission to keep everyone safe and don't let a few vocal people pressure you into loosening the mask mandate.	1
The vaccine set-up at the PCR was amazing.. very organized, professional and private.	1

The rules and mandates are helping us maintain a safer environment than the rest of the USA. This continues to be important due to our circumstances and location. We can't let down our guard. You should make sure public safety is onboard with mandates.	1
The Pool/Aquatics Center was not included on the list of places. I would most definitely go to use that facility without restrictions.	1
The measures that were taken by the City council worked. It could have been much worse.	1
the mandates were not very clear to understand, and they should not be forcing people to get the vaccine to do the road test for DMV	1
The mandates save lives. They may be complicated for people's income but at the very least wearing a mask in a indoor public space, such as a grocery store, does not violate constitutional rights.	1
The mandates are completely arbitrary, some people are supposed to follow them and others get a pass. Also, the people putting them in place have broken them themselves. How is the general populace supposed to trust and follow anything that they don't.	1
The EOC has done a great job with the information and great press releases.	1
The COVID cases labeled as "industry related" is still confusing and a concern for me. If these cases are not in people strictly isolated within industry, I don't understand why they are not considered community.	1
Thanks for all that you're doing. Had it not been for the protective measures, we may have been in a sad state of affairs. Keep up the good works.	1
Thanks for all of the hard work you have done for this entire YEAR of the pandemic. Happy EOC anniversary	1
Thank you for everything. Without your efforts, we would have further positive cases and damaging problems.	1
Thank you for allowing me to work, make friends with the island and it's people.	1
thank you for all you're doing/have done to keep community safe	1
Thank you for all your hard work.	1
Thank you for all your hard work	1
Thank you for all of your hard work! The city press releases were always very clear and helpful.	1

test	1
Surprised by the relaxing of protective measures in places like restaurants. Curious about the sources (from contract tracing data) of infection during the increased community spread experienced over the High Risk period from Dec. 2020 through Feb. 2021.	1
STOP THE MANDATES	1
Stop giving money to the clinic. They are making a mint off this pandemic.	1
Shutting down the town was not the best policy. People should have been able to self protect themselves for the most part. The death rate in Alaska for COVID is .0051%, and this is letting the hospitals dictate if the cause of death is from COVID or not	1
Should follow CDC guidelines	1
Right now the policy that they placed regarding people who are getting their drivers license & testing should be change, I dont think the City has the right to impose to people to get vaccinated- it should be their choice not a requirement	1
Ready for this the end.	1
Question 4 and 8 are confusing. For example, question 4 could be "If no protective measures were in place tomorrow, how likely are you to visit the following:"	1
Positive cases should be reported as travel related and community spread. Industry is apart of this community. There are no closed campuses here and all of the people who work in "industry" go every where around this town.	1
Please open schools for the rest of the year.	1
Please follow the science and up-to-date guidance by the CDC and state. Don't make recommendations based on fear, but by science and legal authority. Treat everyone equally.	1
Personal accountability, quit with mandates. My family has suffered so greatly over the past year due to mandates.	1
Our community needs to open. If a person is at high risk or even not at high risk, they can make decisions about what they feel comfortable doing or not doing. We know more about the virus at this point and vaccinations are available if wanted.	1
OPEN the city up,, no more restrictions.	1
Only place that I have been in Alaska that has the travel quarantine, which sucks!	1

Once the community has been vaccinated I would like to see all protective measures lifted.	1
Now that most of the community has been either vaccinated or had covid I think we should stop with the restrictive mandates and open up our community completely. I also think they should do antibody testing on those who want it in the community.	1
Nothing	1
Not nearly enough is being done to assess the long-term effects of this whole thing! Particularly, those on city council seem totally unwilling to even discuss perspectives that differ from their own. Those views are deemed "crazy" and ignored.	1
None at this time	1
no other comments	1
No comment except to say that I believe Unalaska did a very good job on containing the virus.	1
no	1
NA	1
Maybe issue reminders to people to not allow "Covid-Fatigue" to keep people from maintaining safe practices.	1
maybe get some city council people to come on KUCB and encourage people to vax up!	1
LOCALS SHOULD NOT HAVE TO QUARANTINE. If you want to force people to do so, then you need to be compensating their pay. Some people HAVE to leave, for medical reasons, multiple times a year, and a lot of jobs are NOT paying people for this time off.	1
Local mandates are the reason we have had virtually no community spread. Thank you for taking the pandemic seriously and keeping us safe. Please keep the mask mandates in place until CDC says they're no longer needed.	1
Local law enforcement should follow the rules themselves. More than any other group of people, I see fire and police department personnel with their masks off, under their noses or around their chins.	1
Lets get on with it.	1
Just continue to be update the public with then new CDC guidelines as they change quickly. Keep up the good work and thank you for keeping our town safe!!!	1

It's been a year, we know more and are better equipped to handle this, people need to move forward, people need to be able to work, utilize services, and kids need to be in school. The social, mental, and financial impacts need to be prioritized.	1
I'm all for vaccines, but I do not think that requiring vaccinations for a road test should be allowed. Shouldn't force people to get vaccinated just for a driver's license.	1
If people who have been vaccinated can still acquire and spread the disease, is it really fair to make those who aren't vaccinated to quarantine, while those who are vaccinated don't have to quarantine?	1
I'd like to move to a reward, rather than a punishment-based system. Can we highlight stories of community compliance & service, instead of chastising? I think that makes people less likely to be honest with contact tracers & makes folks feel oppressed.	1
I'm happy everything is opening up and I am looking forward to the kids going back to school and eventually moving toward going maskless and back to normal.	1
I would like to commend the EOC for the excellent job that they are doing. Had we not have those mandates in place, we would have seen a different outcome. Thank you for your forethought, guidance and considerations. We are all in this together.	1
I would like the city updates to say where (which companies or boats) these 'industry' cases are from.	1
I was very surprised that the Aquatic Center (pool and sauna) was not listed in Question #4. I think it should have been included in the list for myself and others. I definitely rate it as a 5 (very likely to use) for myself.	1
I thought 14 days was long to quarantine, I am thankful I was paid but not everybody has that option like my 2 kids and son's girlfriend who quarantined with and believe that things should not have shut down when we got just 1 Local case.	1
I think the city handled things great.	1
I think the city and EOC have done as good a job as anyone could do under all the circumstances.	1
I think if you are going to get rid of all mandates to keep mask mandate, the mask mandate is important. Masks don't hurt anyone.	1
I moved to the island in August, so I arrived mid-pandemic. I felt safe and continue to feel safe during my time here because of the local mandates in place. The EOC, City Council, etc. have done a remarkable job in their efforts to keep Unalaska safe.	1

I have taken this seriously and assisted elders avoiding high risk areas. We're harming restaurants and their staff by limiting them. High risk individuals will not go to these places and we should let low risk people help support them.	1
I follow all mandates out of respect for the people that are legitimately scared. This whole thing is the biggest scam in our worlds history. I don't believe absolutely anything from anywhere. I just wanna do my part to help the scared citizens.	1
I don't think the way the positives have been grouped is accurate. To say that we have no community spread while having so many cases at processing plants is misleading and puts us at risk. Processors and their families are part of the community!	1
I do not know who is on the EOC or how their decisions are made - no transparency. I do think our risk thresholds are simple and make sense. The press releases are helpful, but a webpage with easy-to-navigate information would be better.	1
I believe people have the right to chose how they live there lives. The kids need to be back in school full time and these strict mandates need to be lifted.	1
I appreciate what the EOC and City Council have done thus far in keeping the community safe. It's a hard job to do. The only thing is enforcement of the mandates, especially of the crabbers and boats coming in, they do not care or follow the mandates.	1
I am ready for the pandemic to be over and for my kids to go back to school and get back to having a normal life. My kids are bored and should not be contained in their house this much. I also think the PCR and library should be open normal hours.	1
Have more respect for people to choose for themselves, than to mandate. You do not mandate citizens, you mandate subjects.	1
Great work during hard times	1
Great job!	1
Great job thanks	1
Good job over all	1
everyone who wants the vaccine is getting it, lower quarantine restrictions	1
Even though this has been horrible, I think the people that are trying to handle our small island and the logistics are doing the best they can.	1
EOC is doing what it supposed to do.	1

End the closures and lockdowns! There is abundant evidence and data nationwide that suggests lockdowns and quarantines do more harm than good. Open the schools. States that have kept schools open have had no problems!	1
Don't ease up mandates too soon or too much. We are almost under control.	1
Continue to give the best advice to elected officials. Unfortunately we are not free and clear of risks yet.	1
Classifying cases as "industry-related" sounds like those cases are isolated to the processing plants, but are often actually among community. This gives a false sense of security, skewing the idea of risk. I believe this is unethical and should change.	1
City mandates have been working well so far to keep our community safe in our unique circumstances. Keep these mandates in place until all those who wish receive the vaccination. Keep watching the data. Follow the science.	1
City employee testing should be mandatory following community outbreaks.	1
As we move into this new phase, the vaccinated members of the community should not be negatively affected. Unless variants arrive on this island, we should not go back to medium. City buildings should open up for full hours and access.	1
Always continue to have an open door policy in case people need to talk to someone when they are alone or going through some kind of crisis in their life.	1
All in all it took courage to impose the restrictions which ultimately served to protect the public, sometimes in the face of stiff and vocal resistance. The EOC, as an entity, has done a great job, as has City Council.	1
A very large number of citizens are too afraid to speak out because of the threats and pressure we're receiving, but know this, we are against you. Our council might not realize, but this is Alaska. We have not been represented and we won't forget.	1
99.99 percent of all who contract Covid-19 recover just fine. This is not a pandemic. If it were a pandemic, there would be dead bodies everywhere in homeless camps and tent cities.	1
1. The Covid stats reported by the city is very difficult to make any sense out of. 2. How is it legal to have only vaccinated people perform a drive test at DMV? How about people bring their own cameras? Plastic film can be put between tester and driver?	1
